Ceil Endocrinol 112:83-93(1995).
FUNCTION: TRANSCRIPTION FACTOR THAT BINDS AND ACTIVATES THE PROMOTER OF THYROTD SPECIFIC GENES SUCH AS THYROGLOBULIN, THYROPEROXIDASE, AND THYROTROPIN RECEPTOR. CRUCIAL IN THE MAINTENANCE OF THE THYROID DIFFERENTIATION PHENOTYPE. MAY PLROLE IN LUNG DEVELOPMENT AND SURFACTANT HOMEOSTASIS.
SUBCELLULAR LOCATION: NUCLEAR.
TISSUE SPECIFICITY: THYROID, LUNG AND CNS.
TISSUE SPECIFICITY: THYROID, LUNG AND CNS.
SIMILARITY: BELONGS TO THE NK-2 FAMILY OF HOMEOBOX PROTEINS.

THE LOYALTION THAT BINDS AND ACTIVATES THE
C. I. SHOCHEM. 241:101-113(1996).
THE FUNCTION: TRANSCRIPTION FACTOR THAT BINDS AND ACTIVATES THE
PROMOTER OF THEFULD SPECIFIC GENES SUCH AS THYROGLOBULIN,
THYROPEROXIDASE, AND THYROTROPIN RECEPTOR. CRUCIAL IN THE
ANINTENANCE OF THE THYROID DIFFERENTIATION PHENOTYPE. MAY PLAY A
C. ROLE IN LUNG DEVELOPMENT AND SURFACTANT HOMEOSTASIS.
C. I. SUBCELLULAR LOCATION: NUCLEAR.

-- FUNCTION: CATALYZES THE COVALENT ATTACHMENT OF UBIQUITIN PROTEINS (BY SIMILARITY).

-- CATALYTIC ACTIVITY: ATP + UBIQUITIN + PROTEIN LYSINE = AMP + PYROPHOSPHATE + PROTEIN N'UBIQUITYLLYSINE.

-- PARHMAY: SECOND STEP IN UBIQUITIN CONJUGATION.

-- PARHMAY: SECOND STEP IN UBIQUITIN TREDUTED FOR UBIQUITIN-THIOLESTER FORMATION (BY SIMILARITY).

-- SIMILARITY: BELONGS TO THE UBIQUITIN CONJUGATING ENZYME STRONGEST, TO HUMAN UBC7.

11 FUNCTION: INVOLVED IN UV PROTECTION AND MUTATION. ESSENTIAL FO INDUCED (OR SOS) MUTAGENESIS. MAY MODIFY THE DNA REPLICATION MACHINERY TO ALLOW BYPASS SYNTHESIS ACROSS A DAMAGED TEMPLATE.

1- SIMILARITY: BELONGS TO PEPTIDASE FAMILY S24 ALSO KNOWN AS THE UMUD/LEXA FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              MEDLINE: 96202734.

Bacteriol. 174:2582-2591(1992).

-!- FUNCTION: MEMBER OF THE TWO-COMPONENT REGULATORY SYSTEM VANS/VANR.

-CTIVATES THE TRANSCRIPTION OF VANH, VANA AND VANX IN RESPONSE TO VANCOMYCIN WHICH RESULTS IN VANCOMYCIN RESISTANCE. VANS ACTIVATES VANR BY PHOSPHORYLATION.

-!- SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN (POTENTIAL).

-!- SIMILARITY: TO OTHER PROKARYOTIC SENSORY TRANSDUCTION HISTIDINE KINASES.
                                                                       01-JUN-1994 (Rel. 29, Created)
01-JUN-1994 (Rel. 29, Last sequence update)
15-JUL-1998 (Rel. 36, Last annotation update)
REGULATORY PROTEIN E2.

                                                                                                                                                                                                                                                                         SUBCELLULAR LOCATION: NUCLEAR.
                                                                                                                                                                                                                                                                                                                        FUNCTION: E2 REGULATES VIRAL TRANSCRIPTION AND DNA REPLICATION.
IT BLODS TO THE E2RE RESPONSE ELEMENT (5 -ACCNNNUNGGT-3') PRESEI
IN MULTIPLE COPIES IN THE REGULATION REGION. IT CAN EITHER
ACTIVATE OR REPRESS TRANSCRIPTION DEPENDING OF E2RE'S POSITION
WITH REGARDS TO PROXIMAL PROMOTER ELEMENTS. REPRESSION OCCURS
BY STERICALLY HINDERING THE ASSEMBLY OF THE TRANSCRIPTION
BY INITIATION COMPLEX. THE E1-E2 COMPLEX BINDS TO THE ORIGIN OF DNA
                                                                                                                                                                                                                                                                                                           REPLICATION.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              QRNEFLSTVK

Biochemistry 35:2095-2103(1996).

-I - FUNCTION: E2 REGULATES VIRAL TRANSCRIPTION AND DNA REPLICATION.

-I - FUNCTION: E2 RESPONSE ELEMENT (5'-ACCUNUNUNGGT-3') PRESENT IN MULTIPLE COPIES IN THE REGULATORY REGION. IT CAN EITHER ACTIVATE OR REPRESS TRANSCRIPTION DEPENDING OF E2RE'S POSITION WITH REGARDS TO PROXIMAL PROMOTER ELEMENTS. REPRESSION OCCURS BY STERICALLY HINDERING THE ASSEMBLY OF THE TRANSCRIPTION BY STERICALLY HINDERING THE ASSEMBLY OF THE TRANSCRIPTION
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              EMBL; J04353; AAA46953.1; -.

-I- FUNCTION: E2 REGULATES VIRAL TRANSCRIPTION AND DNA REPLICATION.

IT BINDS TO THE E2RE RESPONSE ELEMENT (5'-ACCUNUNUNGGT-3') PRESENT

IN MULTIPLE COPIES IN THE REGULATORY REGION. IT CAN EITHER

ACTIVATE OR REPRESS TRANSCRIPTION DEPENDING OF E2RE'S POSITION

WITH REGARDS TO PROXIMAL PROMOTER ELEMENTS. REPRESSION OCCURS

BY STERICALLY HINDERING THE ASSEMBLY OF THE TRANSCRIPTION

BY STERICALLY HINDERING THE ASSEMBLY OF THE TRANSCRIPTION

BY STERICALLY HINDERING THE E1-E2 COMPLEX BINDS TO THE ORIGIN OF DNA

Warine Wart-11 and Wart-12 have temporally and spatially restricted
expression patterns during embryonic development.";
Mech. Dev. 51:341-350(1955).

I.FUNCTION: PROBABLE DEVELOPMENTAL PROTEIN. MAY BE A SIGNALING
MOLECULE WHICH AFFECTS THE DEVELOPMENT OF DISCRETE REGIONS OF
TISSUES. IS LIKELY TO SIGNAL OVER ONLY FEW CELL DIAMFERS.
I.FUNCATION: POSSIBLY SECRETED AND ASSOCIATES WITH THE
EXPRACELLULAR LOCATION:
DEVELOPMENTAL STAGE: EXPRESSED DURING EMBRYOGENESIS.
I. DEVELOPMENTAL STAGE: EXPRESSED DURING EMBRYOGENESIS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            _SEQUENCE 1.0

"DWnt-4, a novel Drosophila Wnt gene acts downstream of homeotic complex genes in the visceral mesoderm.";

Development 121:209-218(1995).

1- FUNCTION: ACTS DOWNSTREAM OF HOMEOTIC COMPLEX GENES IN THE VISCERAL MESODERM AND IS REQUIRED FOR EMBRYONIC SEGMENTATION.

1- SUBCELLULAR LOCATION: SECRETED (PROBABLE).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              PA0589;
